Dear Sir,

#### Sub.: Authorization for squaring off of open position

I/We am/are your client registered under client code: \_\_\_\_\_\_\_. I/ We execute our trades in commodity futures on NCDEX and MCX through the above trading account with you. The commodity market has been experiencing very high volatility since quite sometime. This has resulted in increased risk of losses due to market moving against my/our open position in a very short span of time. In order to protect my/our capital and as a measure of managing risk emanating from high volatility and very long trading hours, I/we authorise you to kindly square off my/our outstanding position taken by me/us, without my/our order or consent, under any of the following situations, whichever occurs first;

- (c) The above parameters viz. time limit for square off and pre-specified percentage of margin deposit/ ledger balance hall be subject to change depending on market conditions, volatility and other factors, your views for which shall be final and binding. You shall be under no obligation to explain or justify such modifications in parameters.

I/We understand that

- (I) The above instruction shall be executed by you on best effort basis and does not result in creating any legal obligation on your part. I/We understand that, volatility, depth of the market and availability of matching order on opposite side are factors beyond your control.
- (ii) The square off may not happen due to either limited ability on your part to track positions of several clients online and square off may not be executed or may be executed much later then specified time limit, due to dealer being preoccupied with other clients.
- (iii) The non squaring off of open positions due to any reason including reasons mentioned in (i) and (ii) above, shall not absolve me/us from my/our obligation to honour my/our settlement obligations as per provisions of Member-Client Agreement, Rules, Regulations, Bye-laws and Business Rules of the Exchanges. (iv) You may use functionalities, if any, available in your trading software application. However, I/ We understand that software and computers may not function, at times, due to technical problems, connectivity issue or bugs.
- (Iv) Thus, while you may try your best to act in accordance with my/our instructions, you may not be able to do so due to any of the above stated reasons or for any other reasons. I/We shall not hold you responsible or accountable for failure to square off my/our position in accordance with the above instructions.

- (v) You may endeavor to communicate my/our transactions as expeditiously as possible, including through SMS confirmation on my/our registered mobile number, any change thereof shall be communicated to you in time. However, you shall not be under obligation to do so. I/We undertake to review my/our transactions and open positions, margin utilization and ledger balances and other reports either through the internet access to your back office or by making inquires.

- (vii) I have agreed to that, In case of squaring off of my position due to MTM Loss being in excess of specified percentage of my collarteral deposited with you including the credit balance in my ledger account with the Company in any segment/Exchange, you may not be able to communicate to me the requirement of additional margin to allow me to keep my open positions due to various factors including the fact that such situation may arise much after normal office hours, and/or multiple clients position may have similar positions and you may not be able to communicate to each of them individually. #### Annexure 1

KUNVARJI SINCE 1960 Driven By Knowledge

#### Additional Risk Disclosure documents for Options Trading

#### **Risk of Option holders:**

- 1. An option holder runs the risk of losing the entire amount paid for the option in a relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires, to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.
- 2. The Exchanges may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

#### **Risks of Option Writers:**

- 1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.
- 2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.
- 3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.
